

BREAKING THE CYCLE OF INTERGENERATIONAL POVERTY

Self Reliant India (SRI) builds structured Education-to-Mobility pathways in government primary school, converting early academic potential into formal employment and long term economic security for under-resourced children.

THE PROBLEM & OUR SOLUTION

India has cut extreme poverty from ~27% to ~ 5.3%, yet unequal access to quality education, skills, and formal jobs keeps income mobility out of reach for millions. Government primary schools open the door to access but rarely convert that access into economic security, trapping children in the same cycles their parents could not break.

SRI integrates a structured Education to Mobility System into government primary schools through SRI curated curriculum , workbooks, assessments and learning-tracking for Grades 4 & 5 helping students qualify for model residential schools (JNVs, Sainik Schools, Eklavya), reach grade-level proficiency, and move on to higher education and formal employment.

OUR PROGRAMS

FELLOWSHIP PROGRAM

Two locally recruited fellows per school deliver 3-5 hrs of daily support in Math, Language & Mental Ability, building foundational skills. Fellows work to build community ownership.

DRONACHARYA PROGRAM

One mission-aligned government teacher per school is trained in SRI's pedagogy, content and tech, building a sustainable, high quality learning system.

SAAJHEDAARI PROGRAM

Partner organizations working on FLN, are trained on SRI's curriculum , assessment framework and monitoring dashboard, scaling mobility pathways exponentially.

Learning Outcomes

VISION 2030

SRI is scaling to empower historically under- resourced families to achieve self- reliance in 500 districts across India reaching 3 lakh students through all programs.

JOIN THE MOVEMENT

SRI's work is rooted in one idea: by building structured pathways from classrooms to formal employment, we don't just improve learning, we convert learning into mobility.
